Zaoli

Early maturity Light green Wide adaptability

- Early maturity
- Round shape, thick flesh
- Light green color with spots on the skin
- The first female flower appears at 8th to 11th node
- 4-6 fruits set continuously
- Thick flesh, good quality
- Harvest tender fruit at 0.4-0.6kg
- Tolerance to low temperature
- Wide adaptability

Green long sponge gourd

Big fruit High yield Wide adaptability

- Early maturity
- The first flower appears at 6th to 7th node
- Vine plant, vigorous growth
- Straight fruit, green skin
- Uniform fruit
- 32-35cm length, 6-7cm diameter
- Around 500g single weight
- Concentrated fruit setting ability
- Wide adaptability
- Prolific, high yield
- Suitable for green house and open field

Early maturity Heat tolerance Wide adaptability

- Early maturity
- The first flower appears at 6th to 7th node
- Vine plant, vigorous growth
- Straight fruit, green skin
- Uniform fruit
- 32-35cm length, 6-7cm diameter
- Around 500g single weight
- Concentrated fruit setting ability
- Wide adaptability
- Prolific, high yield
- Suitable for green house and open field

SP No.2

Cuilv

Early maturity Straight fruit High yield

- Early maturity, vigorous plant
- About 40 days from transplanting to harvest
- The first fruit set on around 7th node
- Nice green color
- Cylindrical fruit, uniform and straight
- 30-32cm length, 7cm diameter
- 500-600g single weight
- Good commercial quality
- High yield

Early maturity Smooth skin Uniform fruit

- Early maturity, vigorous plant
- Whitish green color
- Smooth skin with glossy
- Cylindrical fruit, uniform
- Good continuous setting ability
- 20-25cm length, 5-7cm diameter
- 350-400g single weight
- Good taste
- Standing well in shipment
- Strong diseases resistance

Feng Xiang

Xiangyu No 1

Early maturity Good commercial quality

- Early maturity, vigorous plant
- Good continuous setting ability
- Yellowish green color
- Long fruit, uniform
- 38-42cm length, 4cm diameter
- 400g single weight
- Good commercial quality
- Strong diseases resistance
- Wide adaptability

White baby No. 1

Early maturity No cavity compact flesh

- Early maturity
- Vigorous plant
- The first female sets on 10th node
- Around 1kg of young fruit
- Around 3kg of ripe fruit
- 21cm length, 20cm diameter
- Thick powder on the surface when mature
- No cavity, compact flesh in light green color
- Crisp and sweet taste

White baby No.4

Early maturity Light green color Super flavor

- Early maturity
- Vigorous plant
- The first female sets on 10th node
- Around 1kg of young fruit
- Around 2kg of ripe fruit
- 20cm length, 13cm diameter
- Light green color with white spots
- Thick powder on the surface when mature
- No cavity, compact flesh in light green color
- Crisp and sweet taste with super flavor

Long Bean No.1

Medium maturity Prolific Heat tolerance

- Medium maturity, vigorous plant
- High yield
- Pod about 80cm in long, good thickness
- Nice green color, glossy
- Straight pods in good commercial quality
- Long time stay in field for mature pods
- Good tolerance to heat. Prolific
- Good stress resistance
- The best growing temperature is 24°C-33°C

Vigorous growth thick pod High quality

- Medium early maturity
- Vigorous growth
- Pods set on both main vine and branch
- The first pod sets on 3rd to 5th node
- Dark green leaves in medium size
- Pod around 80cm long
- Nice green pod with glossy
- Straight and thick pod
- Standing well in shipment
- Good commercial quality
